Caverion Denmark and Assemblin Sweden will deliver technical installations for the expansion of a data center in Denmark

Caverion Denmark and Assemblin Sweden have entered into an agreement to deliver technical installations for the expansion of a data center in Denmark. The estimated value of the assignment is approximately 160 MSEK.

The project is a so-called TS-MEP project (mechanical, electrical and plumbing), where Caverion Denmark will deliver technical electrical installations within medium and low voltage as well as fire. Assemblin Sweden will deliver cooling, ventilation, security, automation, heating and sanitation. The expansion is being carried out while the data center is in full operation, which increases the complexity of the project.

“The data center will be in full operation during the entire project period, which increases complexity and places high demands on planning, coordination, and execution. At the same time, data centers place some of the highest demands on operational reliability, redundancy, and energy efficiency. This emphasises our strong competencies within technical solutions in critical technical infrastructure, where there is no room for compromise,” says **Carsten Sørensen**, CEO Denmark, EVP.

The project demonstrates the complementary strength across the Assemblin Caverion Group, where specialised competencies are combined to deliver complex technical solutions for critical infrastructure.

“The project is a strong example of how we bring together our multi-technical capabilities across the Group to deliver reliable and energy-efficient solutions. We look forward to contributing our expertise within refrigeration, ventilation, security, automation, heating and sanitation,” says **Fredrik Allthin**, CEO Sweden, EVP.

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden and Norway. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration in some 100 locations and are supported by a strong organisation. Read more at assemblin.se.

About Assemblin Caverion Group

Assemblin Caverion Group is the leading northern European technical service and installation provider. The Group employs about 20,000 skilled professionals in nine countries, sharing a passion for smart and sustainable solutions. We deliver installations and technical services and solutions along the full lifecycle of the built environment, supporting our customers and their increasing demand for energy-efficiency, sustainability and automation for buildings, infrastructure and industrial sites. Assemblin Caverion Group was formed in April 2024 through the

combination of Assemblin and Caverion. Our total revenue amounts to SEK 41 billion/EUR 3.8 billion. Read more at assemblincaverion.com.
