## Assemblin strengthens its technical competencies within cooling with the acquisition of STK in Finland

**Assemblin has acquired Suomen Teollisuuskylmä Oy (STK), a Finnish refrigeration company with strong environmental focus. STK has an annual turnover of approximately 8.7 MEUR and 25 specialised staff.**

STK was founded in 2011 and has important maintenance contracts, primarily within ammonia-based cooling systems, with leading players in the food, forestry, chemical and energy sectors as well as logistic centres and ice rinks across Finland. In addition to maintenance work, the company installs and renovates cooling systems and has a significant competence within district heating facilities. STK has a strong environmental focus mainly using natural refrigerants or refrigerants with a low GWP value. Examples of customers include Fazer, Saarioinen, Valio and Turku Energy. The operations are based in Tampere, Turku and Helsinki.

“We are thrilled to welcome STK’s staff and customers to Assemblin. STK is a very competent and well-run company that both strengthens and broadens our competencies within cooling. STK complements our current business in Finland in a good way and we expect that we will be able to cooperate and expand through cross-sales across our cooling portfolio”, says Jukka Jäppinen, COO Assemblin Finland.

For more information regarding STK, please refer to [www.teollisuuskylma.fi](http://www.teollisuuskylma.fi)

### **About Assemblin**

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We do this through close local collaboration supported by a strong organisation. We have annual sales of approximately SEK 10 billion and 5,900 dedicated employees at more than 100 locations in the Nordic region. Read more at [assemblin.com](http://assemblin.com).
