

Assemblin

Extended cooling framework agreement for three ice rinks in Huddinge

Through a new framework agreement, Assemblin Ventilation's cooling operations in Stockholm have secured renewed trust from the Municipality of Huddinge for service, maintenance and troubleshooting at three indoor ice rinks. The assignment is subject to a ceiling volume of SEK 20 million and applies over a two-year period with the possibility of a further two-year extension.

The new framework agreement covers planned and corrective maintenance, documentation and advisory services regarding cooling plants using ammonia as their refrigerant at three indoor ice rinks (Stortorps IP, Visättra IP and Segeltorpshallen) in the Municipality of Huddinge, outside Stockholm.

"Cooling technology is one of our growth areas and we have, in recent years, built a strong organisation with superior expertise at several locations in Sweden. We are very pleased to have secured the renewed trust of Huddinge Samhällsfastigheter (the Municipality of Huddinge's Community Properties Department) and, in close partnership with them, we look forward to contributing to well-functioning and energy-efficient cooling plants at the relevant facilities," says Håkan Ekvall, EVP and Business Area Manager, Assemblin Ventilation.
