

Assemblin

Assemblin secures an additional assignment for NKT

Assemblin EI has signed an additional agreement with NKT in Karlskrona, where all of Assemblin's Swedish business areas are already involved in the construction of NKT's third extrusion tower.

The new assignment in the third tower concerns electrical installations in new production halls for finishing and armoring the cables produced at the facility. The project extends until 2027. All the Assemblin Swedish business areas were also involved in the construction of NKT's second tower, which was completed in 2022.

"We are very pleased to continue to be involved in the development of NKT's facility in Karlskrona. All our technical disciplines have shown great commitment and professionalism in our many assignments. The fact that we are now receiving renewed trust and additional assignments shows our ability to meet the customer's needs," says Jonas Klarén, CEO of Assemblin EI, SVP.

NKT's facility in Karlskrona manufactures both sea- and land-laid high-voltage cables, a special high-voltage cable that is laid on the seabed to, for example, connect offshore wind farms. The facility will be the world's largest factory for high-voltage submarine cables, contributing to developing the distribution of renewable energy sources and increasing the technological development in Blekinge and the rest of Sweden.

About NKT

NKT connects a greener world with high-quality electrical cable technology and takes a central role as the world moves towards green energy. NKT designs, manufactures and installs low, medium and high voltage solutions that enable sustainable energy transmission. Since 1891, NKT has innovated the power cable technology that built the infrastructure for the first light bulbs to that for the megawatts created by renewable energy today. NKT is headquartered in Denmark and employs 6,000 people. NKT is listed on Nasdaq Copenhagen and had sales of EUR 3.3 billion in 2024. www.NKT.com

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden and Norway. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration in some 100 locations and are supported by a strong organisation. Read more at assemblin.se.

About Assemblin Caverion Group

Assemblin Caverion Group is the leading northern European technical service and installation provider. The Group employs about 20,000 skilled professionals in nine countries, sharing a passion for smart and sustainable solutions. We deliver installations and technical services and solutions along the full lifecycle of the built environment, supporting our customers and their increasing demand for energy-efficiency, sustainability and automation for buildings, infrastructure and industrial sites. Assemblin Caverion Group was formed in April 2024 through the combination of Assemblin and Caverion. Our total revenue amounts to SEK 41 billion/EUR 3.6 billion. Read more at assemblincaverion.com.
