## Assemblin in Norway in new heating and sanitation assignment for major project in Sandvika

**Assemblin in Norway has signed an agreement with Skanska for the installation of heating and sanitation in the new Helgerudkvarteret block in Sandvika, outside Oslo.**

Helgerudkvarteret represents the first stage of a major urban development project in central Sandvika. The project will result in a combined-use building, including both commercial premises and housing. The entire basement and half of the project have now been contracted. Assemblin's contract includes 238 apartments, offices and commercial premises, parking levels and technical buildings, with a total of 58,000 m<sup>2</sup> of floor area. The order is included in the order intake for the fourth quarter of 2021.

The project has been developed by Andenæs Eiendom, which owns several buildings in Sandvika. The company has been working on the development of this project since the early 2000s.

"We are very happy to be part of this significant major urban development project in Sandvika. With the combination of premises and housing and, in particular the ambitious environmental targets set for the project, this project fits very well into our contracting portfolio and with our profile. We have spent a year participating in the design process alongside Skanska and Andenæs Eiendom. We now look forward to commencing the production phase, probably just after the 2022 summer vacation period," says Leif Stensrud, Regional Manager at Assemblin.

The lower five floors in Helgerudkvarteret will be commercial premises, with shops and restaurants at street level. The homes will be situated in six independent residential buildings above the rooftops of the commercial premises. The residential buildings will range from six to ten storeys in height. The project, which will be completed in 2025, will be environmentally certified in accordance with the BREEAM NOR Excellent standard.

### **About Assemblin**

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 10 billion and about 6,300 dedicated employees at more than 100 locations in the Nordic region. Read more at [assemblin.com](https://www.assemblin.com).
