## Assemblin grows in the high voltage segment through new framework agreement with E.ON

*Assemblin Electrical has signed a framework agreement with E.ON Energidistribution AB (E.ON) regarding smaller and larger projects at substations within two of their energy distribution areas in Sweden.*

The framework agreement concerns the installation of electrical technology at regional grid substations within E.ON's areas in Central and Southern Sweden, and is valid for two years with an option to extend for another year. The assignment is divided into two parts, smaller projects of between SEK 2 - 5 million, and larger projects of between SEK 5 - 30 million. The individual projects are subject to tendering procedures under the terms of the framework agreement.

"High voltage is one of our strategic focus areas and with this agreement we strengthen our position within these projects in Sweden. We are very proud of this assignment and look forward to creating stable and sustainable solutions in collaboration with E.ON," says Jonas Klarén, CEO of Assemblin Electrical, SVP.

E.ON is Sweden's largest grid operator with approximately 137,000 km of electricity grid, most of which is in rural areas. E.ON's most important mission is to secure electricity distribution to over 1 million customers throughout Sweden.

### **About Assemblin**

Assemblin is an end-to-end installation and service partner with operations in Sweden and Norway. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration in some 100 locations and are supported by a strong organisation. Read more at [assemblin.se](https://assemblin.se).

### **About Assemblin Caverion Group**

Assemblin Caverion Group is the leading northern European technical service and installation provider. The Group employs about 20,000 skilled professionals in nine countries, sharing a passion for smart and sustainable solutions. We deliver installations and technical services and solutions along the full lifecycle of the built environment, supporting our customers and their increasing demand for energy-efficiency, sustainability and automation for buildings, infrastructure and industrial sites. Assemblin Caverion Group was formed in April 2024 through the combination of Assemblin and Caverion. Our total revenue amounts to SEK 41 billion/EUR 3.6 billion.
