Three prestigious assignments for Assemblin Norway

This spring, Assemblin Norway was entrusted with the task of assisting in the planning of heating and sanitation solutions in three exciting new partnering projects in Oslo. The assignment entails the possibility, in a later phase, of also performing installations estimated at a total value of approximately NOK 800 million, of which some NOK 130 million has already been contracted for the implementation phase.

The new projects are all located in the Oslo area and will run for several years, some of them through 2026.

- The new Storbylegevakta hospital project, in which Assemblin has been assigned the planning and implementation of heating and sanitation installations. Client: Skanska Norge AS.
- Reconstruction and renovation of the government quarter (basement and energy and heating systems), in which Assemblin initially has been assigned the planning of heating and sanitation installations. Client: Veidekke.
- Construction City in Ulven, a new office cluster for the construction industry, in which Assemblin initially has been assigned the planning of heating and sanitation installations. Client: Construction City Eiendom AS.

The three current projects are partnering projects in which Assemblin will enable the development of installation solutions in close collaboration with both clients and builders.

“Price will always be a key competitive factor, but documented implementation capacity, quality and competence are entirely crucial as regards advanced projects like these. We have put a great deal of effort into our project development division over the last few years, which is greatly appreciated in these assignments. Moreover, we have a great deal of experience with similar projects. I am extraordinarily proud of the organisation we have today. Skilled employees are the key to these successes,” says Torkil Skancke-Hansen, CEO of Assemblin AS in Norway.

Assemblin Norway is currently a strong player in heating and sanitation but has also focused on the ventilation and electricity segment over the past few years.

These prestigious assignments reinforce our position as a leader in heating and sanitation in Norway. It is a real sign of our strength, confirming the idea that many clients turn to the major established players in times of uncertainty,” says Mats Johansson, President and CEO of Assemblin.

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 10 billion and about 5,900 dedicated employees at around 100 locations in the Nordic region. Read more at assemblin.com.
